

HOW TO MEASURE

To measure the beveled Sill Angel (D)

Step 1. Place a carpenter's square against the side blind stop, with its base resting on the sill.

Step 2. Measure the distance (rise) at point A, of the sill from the 2" mark.

Step 3. Use the sill angle chart to find the angle.

Sill Angle Chart

Using the rise found at the 2" mark on the square determine the sill angle.

Rise at A	Angle
1/8"	4°
1/4"	7°
3/8"	11°
1/2"	14°
